Learning Support in Sakura City

For children

For children who have recently moved to Sakura City and find school Japanese difficult, we provide study support. We also help explain letters and notices from the school when they are hard to understand.

In addition, children who already understand daily
Japanese but still struggle with subjects such as Japanese
language or mathematics can also study with us.

For parents and adults

We also offer classes for parents, where you can learn useful Japanese for daily life and school communication.

Adults other than parents are also welcome to join these classes.
